SUPPLEMENT TO REPORT NO. FT 110 - 1958

CHANGES PROPOSED IN THE HANDLING OF INFORMAL AND UNDER $100 FORMAL ENTRIES IN THE IMPORT STATISTICS

The Bureau of the Census has recently received a suggestion to discontinue all work on informal import entries. Under current procedures information from informal import entries (which are limited in value to $250 or less) and formal entry shipments valued at less than $100 is omitted from the regular monthly and annual commodity statistics and is included in country totals on the basis of a 1% sample estimate. In addition, for 1957 and prior years annual estimates of commodity totals have been published as an appendix to the calendar year issue of Report No. FT 110. Annual commodity information for 1958 is not being compiled pending a decision as to what, if any, statistics will be compiled on these low valued shipments in the future. During 1958 there were about 1.4 million informal entries with an estimated value of about $88 million and about 350,000 formal entry shipments valued at less than $100 with an estimated value of $12 million.

Before any action is taken to discontinue or to reduce the statistics compiled for these shipments the Bureau would like to receive comments from users of the statistics. Outlined below are three alternatives for processing these low valued shipments. Comments on alternatives A, B, & C should be forwarded to the Bureau of the Census, Washington 25, D. C., by September 1, 1959. If a preference is expressed for alternative C, the only alternative under which commodity information is provided, it would be appreciated if the Schedule A commodities in which there is an interest are listed.

ALTERNATIVE A - *Discontinue all work on informal and $1-$99 formal entry shipments (no statistics of any type available)*

If there is no interest, or very little interest, in data for informal and $1 to $99 formal entry shipments, all work to compile any data on such shipments will be discontinued. Census will no longer request copies of informal entries of the Collectors of Customs and no selection or tabulation will be made of $1 to $99 formal entry shipments.

ALTERNATIVE B - *Compilation of monthly and annual over-all and country total estimates for $1-$99 formal entry shipments and informal entry shipments. (No commodity data to be published even on an annual basis.)*

Under this alternative, estimated figures would be compiled from a one percent sample of the entries for inclusion in the monthly and annual statistics under an arbitrary Schedule A commodity number with rate provision (rate of duty) code "10" for imports free of duty and arbitrary code "99" for dutiable imports. In addition, the estimates would be included in the following monthly and annual totals:

a. The over-all import total

b. The commodity group total for "Group 9-Miscellaneous" (published in FT 110, FT 120, and FT 900-I)

c. An arbitrary commodity subgroup code "99" (published in FT 110 and FT 120)

d. The country totals (published in FT 120 and FT 950)

e. An arbitrary Customs District code "99" (published in FT 970-I)

f. The economic class total for finished manufactures (published in FT 930-I and the Quarterly Summary)

Under this alternative the compilation of the estimated value figures for the above monthly and annual totals would be accomplished by either (1) taping the one percent sample of entries each month to establish estimated values by country of origin (and over-all imports) or (2) selecting the one percent sample of entries every three or six months to establish value figures by country of origin (and over-all imports) and to use these estimates as "bench marks" for estimating the values for subsequent months of the year.

No commodity data whatsoever would be compiled or published under this alternative. However, it would be possible, on a cost to the subscriber basis, to examine the one percent sample (or any other sample) of entries and compile the desired commodity detail.

ALTERNATIVE C - *Compilation of monthly and annual over-all and country total estimates, and annual estimates of imports in terms of 4-digit Schedule A commodity classifications for informal entries and in terms of 7-digit Schedule A commodity classifications for $1 to $99 formal entries.*

Under this alternative estimated value figures would be compiled for the monthly and annual over-all and country totals specified in Alternative B (above). In addition, the Bureau would plan to continue compilation of supplemental tables from the sample of informal and formal import entries on an annual basis presenting data in terms of 7-digit Schedule A commodity classifications for the $1 to $99 formal entries, and in terms of 4-digit Schedule A commodity classifications for informal entries (descriptions shown on informal entries are not sufficient to permit classification in terms of the full 7-digit Schedule A detail). These data would be similar to that shown in this Supplement and in Appendix B of the 1954 through 1957 annual issues of Report No. FT 110. It would of course be possible to compile the commodity data for only the formal entries where the 7-digit Schedule A commodity detail is available. On the other hand it should be noted that an estimated 80% of the value of informal entry shipments appear to represent commercial shipments based on name and address of the importer.

The figures shown in Report FT 110 for Schedule A No. 9999 500 (UN 100 form and UN 251 inf est) provide information as to the amounts which would have been omitted from the various country totals under Alternative A above. Separate estimates of the amounts from the under $100 formal entries and from informal entries will be furnished on request.

The table which follows in this Supplement has been prepared to provide the users of the statistics with some indication of the type of detailed commodity data which would be discontinued under Alternatives A and B above. These data are essentially a recompilation of the 1957 calendar year statistics which were published in Appendix B of the 1957 calendar year issue of Report No. FT 110. The estimated totals for the $100 to $250 formal entry shipments have been combined with the fully compiled commodity totals; the estimated totals for the $1-$99 formal entry shipments are shown separately by commodity; and the estimated totals for informal entry shipments are as originally published.

A comparison of the data shown in this Supplement with that shown in Appendix B of the 1957 annual issue of Report FT 110 will provide the user with an indication of the change in coverage between 1958 and 1957 when formal entry shipments valued $100-$250 were also estimated on the basis of a sample.

These data also may be used as a guide in determining the magnitude of the probable undercounting in the detailed commodity statistics for 1958 as a result of the exclusion of informal and $1 to $99 formal entries from the import statistics. However, only a rough measure of the undercounting is possible for any detailed commodity classification, since (1) the estimated value for $1 to $250 shipments reported on informal entries is shown only in terms of four-digit commodity groupings and not in terms of seven-digit commodity detail, and (2) all estimated values are subject to sampling variability.

UNITED STATES IMPORTS OF MERCHANDISE FOR CONSUMPTION BY SEVEN-DIGIT SCHEDULE A COMMODITY FOR COMMODITIES FOR WHICH THERE WERE $1-$99 FORMAL ENTRY SHIPMENTS IN THE SAMPLE AND BY FOUR-DIGIT SCHEDULE A COMMODITY GROUPING FOR ALL OTHER CLASSIFICATIONS—CALENDAR YEAR 1957

On the basis of measures which indicate the degree of reliability to be attached to a specified valua on a two-chancas-out-of-thraa basis, the sampling variability of any value comprised aolely of $1 to $99 informal or $1 to $250 informal estimatea can be approximated on tha basis of the value itself. Where the value is laas than $5,000 the variability is in general between $4,000 and $6,000. If the value is between $5,000 and $20,000 the variability is in general batween $5,000 and $10,000. If ths value is between $20,000 and $100,000 the variability is in general between $10,000 and $20,000. If the value is batween $100,000 and $500,000 the variability is in general batween $20,000 and $40,000. Tha variability of valuas of $500,000 and ovar is ganerally less than 7 percsnt. If a fully compiled figure is added to an satimated valua, the absolute sampling variability of the sum is the sama as ths absolute sampling variability of the astimated figure alone.

A rough astimate of tha value of total imports on a commodity basis can be obtained by adding tha eatimatad $1 to $99 shipments to tha commodity totals shown for shipments valued $100 and over, plus an allowance for sampling variability, in accordance with tha examples given below. However, caution should be used in adding to the data for any particular seven-digit classification tha value of shipments on informal entrisa which is provided only in terms of the four-digit commodity grouping. It is not known if all, part, or any, of the value of the informal entries represents a particular seven-digit commodity classification within the four-digit grouping. The users own knowledge of the usual pattern of shipments on informal entriaa may enabla him to make a rough approximation of tha distribution among the seven-digit clasaificationa of the value of shipmenta on informal entriaa.

Example (1) Total imports of commodity 0010 600 may be astimated as follows: Tha aatimated value of $21,200 for formal entry $1 to $99 shipments plus all, or a part (if any) of informal entry shipments astimated at $3,000. If it is assumed (based on the user's knowledge of the importing pattern) that informal entry importations are distributed among tha 7-digit classifications within the 4-digit grouping in the same general pattern at the $1 to $99 formal entry shipments, then $21,200 plus approximately $1,000 (assumed informal entries) equals about $22,000 estimated total formal and informal shipments. With allowance for sampling variability of about $10,000 it might be assumed that informal and $1 to $99 formal entry shipments of commodity number 0010 600 would not be greater than $32,000 or laas than $12,000, and that total imports of commodity 0010 600 would probably not be greater than $423,000 or less than $403,000.

Example (2) Commodity 0025 900 ia not listed, but is included in the 4-digit grouping "Other 0025" becausa there were no formal entry $1-$99 shipments selected in tha sample for this commodity. By reference to the 1957 annual FT 110, it is determined that the fully compiled total for imports of commodity 0025 900 amounted to $1,463. Since there ware no $1 to $99 formal entry shipments included in ths sample for 0025 900, formal $1 to $99 ahipments for this commodity probably were not greater than $2,000. Because of ths higher value limits for informal shipments than for sampled formal entriea, it would not be possible to datermine the probable distribution of the informal astimate for grouping 0025 among tha individual 7-digit commodities without some spacific knowledge of the importing pattern for commoditiea in the 4-digit grouping.

Commodity (detailed seven-digit classification or four-digit grouping)	Formal shipments valued $100 and over1 (dollars)	Estimated shipments: $1 to $99 formal entries (dollars)	Estimated shipments: $1 to $250 informal entries2 (dollars)

*No estimate for "Estimated shipments" is shown because either no $1 to $99 formal or $1-$250 informal items appeared in the sample. Statistical measures indicate that the resulting undercounting may be as much as $2,000. However, for commodities not ordinarily imported in "Low valued" shipments, the figures in the table may be accepted as substantially correct. See Appendix B of the 1957 Calendar year issue of Report No. FT 110 for further information concerning the reliability to be attached to individual commodity and commodity grouping totals.

**This 4-digit commodity grouping includes one or more 7-digit Schedule A commodity numbers which were shown separately in Appendix B of the 1957 annual issue of Report No. FT 110 and are footnoted in the 1958 annual FT-110. These commodity numbers are not being shown because all formal entry items selected in the sample were individually valued $100–$250. For a complete list of the commodity numbers not shown in this supplement and the estimated value of the sampled formal shipments, see Appendix B of the 1957 annual FT-110.

[1]Data for "Formal shipments valued $100 and over" include fully compiled totals for shipments valued $250 and over, plus an estimate of the value of $100–$250 formal shipments based on a five percent sample.

[2]The data shown are for only those informal entries which contained commodity descriptions detailed enough to permit presentation of the data by 4-digit classifications. Excluded are those informal entries on which the description of the merchandise was not specific enough to permit presentation of the data except in terms of (1) commodity subgroup (i.e., groupings of 4-digit classifications), or (2) an arbitrary catch-all classification ("other 1–250 dollar items) which has been set up as a separate commodity subgroup. (See Appendix B of the 1957 annual FT-110 for these totals.)

The statistics in this volume were prepared, under the direction of the Foreign Trade Division, in the Economic Operations, Machine Tabulation, and Administrative Service Divisions. The persons contributing most directly to this publication are listed below:

Foreign Trade Division: Import Branch, Dino S. Villa, Chief; Shirley Dungee, Assistant Chief; Classification and Codes, Walter B. Simpson (Retired), John R. Anglin; Publications, Special Investigations and Regulations, Sadie Bayne. Economic Operations Division: Clerical Processing Branch, Wesley R. Grier, Chief; Procedures Branch, Nathan Lesowitz, Chief; Methods Evaluation and Determination Branch, Samuel Schweid, Chief; Electronic Programming Branch, Jack A. Scharff, Chief; Nathaniel Swersky, Assistant Chief; Foreign Trade Section, Caromel Wooten, Chief; New York Office, Emily H. Laut, Chief. Machine Tabulation Division: Foreign Trade Section, Mabel Shelton, Chief. Administrative Service Division: Graphics Branch, Robert H. Brooks, Chief; John F. Lanham, Assistant Chief.

GENERAL EXPLANATION

COVERAGE

The import statistics include government as well as non-government shipments of merchandise from foreign countries to the United States. However, American goods returned by the United States armed forces for their own use are excluded. Shipments into the United States from Puerto Rico and from the United States territories and possessions and shipments between the territories and possessions and between Puerto Rico and the territories and possessions are not reported as United States imports, but imports into Alaska, Hawaii, and Puerto Rioc from foreign countries are considered to be United States imports and are included in this report. Merchandise shipped through the United States in transit from one foreign country to another is not reported as imports. In general, the import statistics are a complete record of the physical movement of merchandise into the United States from foreign countries (except for intransit shipments), but there are some exclusions of items of relatively small importance in terms of total value such as gifts valued at less than $100.

Imports for consumption shown in this report consist of merchandise entered into United States consumption channels, i.e., merchandise released from Customs custody immediately upon arrival, merchandise entered into bonded manufacturing warehouses (other than smelting and refining warehouses), merchandise withdrawn from bonded storage warehouses for release into domestic consumption channels, and imported ores and crude metals which have been processed in bonded smelting warehouses.

RELATED INFORMATION

Information is also compiled for general imports, which represent total arrivals of imported goods (except for in-transit shipments), i.e., merchandise released from Customs custody immediately upon arrival, plus merchandise entered into bonded storage warehouse, bonded manufacturing warehouse, and bonded smelting and refining warehouse, immediately upon arrival. General import figures covering total trade, country totals and Customs district totals are published monthly. General import commodity statistics are not published but are available for reference purposes.

Trade between the United States, Puerto Rico and United States possessions (not included as United States imports) is presented separately in Report No. FT 800. Statistics on the movement of in-transit merchandise arriving at or leaving the United States by vessel (not included in this report) are also compiled and presented in summary form in Report No. FT 985. In addition, transportation statistics (showing shipping weight as well as value information) are compiled covering that part of general imports of merchandise which arrives by vessel. Summary vessel transportation statistics for both imports and exports are presented in Report No. FT 985. A more complete description of the coverage and presentation of these separate shipping statistics will be found in the introduction to that report.

SOURCE OF INFORMATION

The source of information for all of the imports included in this report, is the import entry (various Customs forms), which importers are required to file with Collectors of Customs for each shipment arriving in the United States. Importers are instructed to report value and country of origin information in accordance with the definition given below.

VALUATION

The dollar value which should be shown on the import statistics is defined generally as the market value in the foreign country and should exclude the United States import duties, ocean freight and marine insurance. In actual practice only the values reported for imports subject to an ad valorem rate of duty (a percentage of the value) will tend to conform precisely to the valuation definition. Imports subject to an ad valorem rate of duty account for only 10-15 percent of the total value of imports. For merchandise not subject to an ad valorem rate of duty (85-90 percent of imports), the reported values may not be in accordance with the above definition. For example, ocean freight may be inadvertently included in the values, values for shipments between allied firms may reflect arbitrary values, etc.

COMMODITY INFORMATION

Commodity information is reported according to the classifications established in Schedule A, Statistical Classification of Commodities Imported into the United States, and is presented in the order of the numbered classifications in that Schedule. The Table of Contents on page 7 of this report indicates the range of Schedule A commodity numbers covering related subgroups of commodities and will assist in locating in the report the statistics for particular commodities. For precise definition of the individual commodity classifications for which figures are presented, reference should be made to Schedule A. The commodity descriptions in this report are necessarily abbreviated to save printing costs and, therefore, in many cases, they do not contain all of the qualifying information necessary to define clearly the commodity for which statistics are shown. The omission of a Schedule A commodity classification from this report indicates no imports of that commodity valued at more than $250. (See Section A of the "Explanation of the Sampling Procedure..." which follows this General Explanation.)

There are substantial difficulties to be faced in obtaining the correct commodity classification in terms of the Schedule A classifications. When more than one classification is provided in Schedule A for commodities subject to the same tariff treatment (i.e., tariff classification and rate of duty) importers are not always likely to use the correct Schedule A commodity code number but may use the first number found for a series of classifications which appears to be applicable. While the more obvious errors in the statistical classifications of commodities by importers may be found during the processing of the statistics, a number of errors may go undetected, expecially if the description of the merchandise shown on the entry is too general to specifically identify the proper commodity classification yet does not appear to be in contradiction with the commodity classification number assigned by the importer.

SPECIAL NOTICE

Effective with July 1957 statistics, the unit used to report quantity data was changed for several Schedule A commodity numbers covering imports of cotton manufactures. Separate data are shown in this report for the January-June transactions and for the July-December transactions for each commodity in order that meaningful quantity data might be shown. These commodities are footnoted in this report. While the quantity data reported in different units are not additive, the two values shown for each commodity classification may be combined to obtain the total value of imports for that commodity.

COUNTRY OF ORIGIN

Though the country which should be reported in the statistics as the country of origin is defined as the country where the merchandise was grown, mined, or manufactured, the country actually shown in the statistics may in a number of cases represent some other country, such as the country of purchase, lading, or the country in which mixed lots of various origin are consolidated. This is particularly true of goods received from, but not originating in, merchanting or transshipment countries such as Hong Kong, Singapore, Netherlands, Belgium, etc.; in such cases the statistics may credit the shipments to such countries rather than the country of origin as defined. It follows, therefore, that imports from such merchanting or transshipment countries are likely to be overstated and imports from other countries correspondingly understated. Where it is known that a country is not the country of origin, the country of shipment is shown and footnoted in this report.

The geographic definition of countries reported are shown in Schedule C, Classification of Country Designations Used in Compiling the United States Foreign Trade Statistics. Country names which are abbreviated in this report to save space are shown in full in Schedule C, together with descriptions of the countries, adjacent provinces, territories, islands, or other areas considered a part of the country for statistical purposes. Schedule C is published as a part of Schedule A (see "Commodity Information" above). A separate edition of Schedule C is also available free upon request to the Bureau of the Census.

Countries are listed for each commodity in this report according to continents, in sequence within each continent from north to south and west to east, in accordance with Schedule C. The omission of a country name indicates no imports of that commodity from that country.

SPECIAL NOTICE

During 1957, Gold Coast (including Ashanti, Northern Territories and Togo) changed to Ghana. The change was made retroactive to March 1, 1957, even though the Gold Coast did not obtain its independence until March 6, 1957, in order to simplify the statistical processing of the import and export data on trade with Ghana and the Gold Coast during the month of March 1957. The commodity statistics in this publication will show for January and February 1957 import data for the Gold Coast and for the months of March through December import data for Ghana.

SOURCES OF FURTHER INFORMATION ABOUT IMPORT STATISTICS

A complete discussion of the compilation procedures and coverage for import statistics will be found in the Foreword to the latest edition of Foreign Commerce and Navigation of the United States. (Copies are available for reference at public libraries.) Regular subscribers to FT reports are automatically supplied with copies of Foreign Trade Statistics Notes, a monthly publication containing information of value to users of foreign trade statistics (such as, changes in type of shipments covered by current statistics, unusual shipments, problems of valuation, classification, etc.). A catalog of United States Foreign Trade Statistical Publications is also available. Data in this report are available for reference purposes prior to the publication of the report or may be obtained in advance of publication on payment of the cost for a special report. Reports providing additional detail compiled but not published can be obtained at a cost basis. For free copies of the catalog or for further information regarding reference copies of tabulations or the availability of special reports, request should be made to the Bureau of the Census.

REPORT NO. FT 110

EXPLANATION OF CHANGES IN COVERAGE AND OF THE SAMPLING PROCEDURE FOR ESTIMATING IMPORTS IN SHIPMENTS INDIVIDUALLY VALUED $250 OR LESS

A. Increase in Coverage of Import Totals by Inclusion of Informal Entries.

Effective January 1954 the coverage of the United States import statistics has been broadened to include, on a sample basis, imports individually valued $250 or less reported on informal entries. Imports on informal entries have not been included in the import statistics prior to January 1954. As explained below, they are being included, effective with January 1954 in the over-all and summary totals only, and are not included in the statistics compiled for the individual Schedule A commodity classifications.

B. Decrease in Coverage in Detailed Import Statistics.

Also effective with the January 1954 statistics, information on immediate consumption imports individually valued $250 or less reported on formal entries, is no longer included in the statistics for the individual Schedule A commodity classifications[1]. Like the imports valued $250 or less on informal entries, they are being included in the statistics on a sample basis, in the over-all and summary totals only. Thus the low-value imports which, according to sample studies made, have generally similar commodity distribution whether covered by formal or informal entries, are treated uniformly in the statistics.

C. Reasons for Changes and Explanation as to Methods Adopted.

The February 1954 issue of Foreign Trade Statistics Notes contains an explanation regarding the increase in the value limit from $100 to $250 for informal entries, effective September 1953, under the Customs Simplification Act; the consequent need for including information on imports covered by informal entries in the statistics; and the reasons why the changes described above were made as a result of this need.

D. The Estimating Procedure.

For imports individually valued $250 or less for both formal and informal entries, a 5 percent sample is taken, and the data compiled from the sample are multiplied by 20 to obtain the estimates included in the statistics. These estimates are included only in the following summary totals:

1. The over-all import total (shown at the end of this report, labeled Grand Total).
2. The country totals (not shown in this report, but published in FT 120 and FT 950).
3. The Customs district totals (not shown in this report, but published in FT 970).
4. The economic class totals (not shown in this report, but published in FT 930 and the Quarterly Summary).
5. The commodity group totals (shown at the end of each commodity group in this report).
6. The commodity subgroup totals (included in this report for the first time effective January 1954 in order that users may have ready access, as more fully explained below, to information on the undercounting in the individual Schedule A classifications in each subgroup resulting from the changed compiling procedure). The commodity subgroups are the groupings of commodities under the approximately 100 subheadings in Schedule A.

[1]The terminology used in this statement, and in later references "imports valued $250 or less covered by formal entries" is not strictly accurate, but has been adopted for convenience. Full compilation procedures are being continued for warehouse withdrawals, regardless of value.

Information on imports individually valued $250 or less is excluded, as mentioned above, from the statistics for individual Schedule A commodity classifications, and from all statistics for cross-classifications such as commodity by country, by Customs district, etc.

E. The Extent of Undercounting in the Import Statistics in this Report Resulting from Omission of imports $250 or less.

1. Commodity subgroup totals (i.e., groupings of commodities):

Since the calendar year total for shipments individually valued $250 or less represents only about 1 percent of the value of all imports, the undercounting for all detailed figures taken as a whole is not great, but it is possible that a high degree of undercounting in individual detailed figures may result. Since the smallest commodity breakdown of the estimated information on shipments valued $250 or less has been published monthly on a subgroup basis only, the annual amount estimated for each subgroup is also being published in this report. As in the monthly issues of the report, the subgroup total figures have been shown immediately preceding the data for the first Schedule A commodity number in each subgroup as illustrated:[2]

Schedule A Number Commodity Description and Unit of Quantity		
Country of origin	Net quantity	Value (dollars)
MEAT PRODUCTS:		
TOTAL.....	...	162,656,103
SAMPLE.....	...	1,048,440
OVER 250.....	...	161,607,663
OVER 250 DATA SHOWN BELOW		
0018 300 BEEF, FRESH, CHILLED, OR FROZEN, BONE IN-POUND		
CANADA.....	2,749,905	819,454
MEXICO.....	1,578,165	281,512
DOM REP.....	1,658,030	480,431
N ZEAL.....	126,393	41,172
	6,112,493	1,622,569

The value of $162,656,103 shown for TOTAL, immediately below the commodity subgroup description MEAT PRODUCTS is the subgroup total, made up of the fully compiled shipments valued over $250 ($161,607,663) for the subgroup, plus the estimated value for shipments valued at $250 or less ($1,048,440).

The value of ($1,048,440) shown for sample is the amount which is estimated, on the basis of the sample, to have been imported in shipments valued at $250 or less for the subgroup.

The value of $161,607,663 shown on the same line with OVER 250 is the total for the subgroup of the fully compiled data for shipments valued at over $250. This total is made up of the detailed statistics in the report shown on a Schedule A commodity by country of origin basis under the heading OVER 250 DATA SHOWN BELOW.

[2]A number of importations reported on informal entries (less than 2 percent of the total estimated value of formal and informal entry shipments valued $1-$250) cannot be classified in terms of commodity subgroup detail. These imports are shown separately, at the end of this report as "Other $1-$250 items" and are arbitrarily included in the total for the group 9 "Miscellaneous" commodities.

In addition to the presentation of subgroup sample data in the main body of this report, estimated values for formal and for informal entry shipments are shown separately in Appendix A at the end of this report.

On the basis of measures which indicate the degree of reliability to be attached to a specified value on two-chances out-of-three basis most of the subgroup value totals in this report in which the sample estimates are included have a limit of sampling variability of not greater than 5 percent. In all cases where the sampling variability is greater than 5 percent the figure is footnoted. In general, the variability of the subgroup value totals for $1-$250 shipments alone is greater than 5 percent.

2. Schedule A Commodity Totals:

Some indication of the undercounting on a seven-digit Schedule A commodity basis without regard to country, is published in Appendix B at the end of this report. (No measures have been made of the extent of undercounting on a commodity by country or other cross-classification basis.) The seven-digit Schedule A commodity information presented in the Appendix is based on the 5 percent sample of $1-$250 shipments filed on formal entries and supplements the commodity data shown in the body of Report No. FT 110 on fully compiled over $250 shipments. In the event a commodity is not listed separately in the appendix it means that there were no formal entry shipments included in the sample although this does not mean that no $1-$250 formal entry shipments were made. If formal entry shipments were made they probably would have amounted to no more than a few thousand dollars.

For each Schedule A commodity in the Appendix a rough measure of the extent of the undercounting can be determined from the information provided in terms of the following figures:

(a) The fully compiled over $250 total dollar value.
(b) The estimated dollar value of $250 and under shipments filed on formal entries, by seven-digit Schedule A commodity classifications.
(c) The estimated dollar value of the $250 and under shipments filed on informal entries in terms of the first four digits of the seven-digit commodity number. (Commodity descriptions in terms of the full seven-digit commodity classifications in Schedule A are not required to be supplied on informal entries. In view of this limitation, the greatest amount of commodity detail for informal entries, which could be provided in the Appendix, was in terms of the four-digit Schedule A commodity groupings.)

A rough estimate of the value of total imports on a commodity basis can be obtained by adding the estimated under $250 shipments plus allowance for sampling variability to the fully compiled over $250 shipments in accordance with the example given in the headnote to the Appendix. Caution should be used in adding to the data for any particular seven-digit classification the value of shipments on informal entries which is provided only in terms of the four-digit commodity grouping. It is not known if, all, part, or any, of the value of the informal entries represents shipments of any particular seven-digit commodity classification within the four-digit grouping. The user's own knowledge of the usual pattern of shipments on informal entries may enable him to make a rough approximation of the distribution among the detailed seven-digit classifications of the value of shipments on informal entries.

F. The Effect of the Change in Coverage and Procedure on the Comparability of the Statistics.

In any comparison of the data ior 1954 or any subsequent years with the data for 1953 or any previous year, consideration should be given any change in coverage and in compiling procedures as described in the coverage statements and explanations which are an integral part of each report.

The over-all import totals have been increased by about 0.5 percent by the inclusion of informal entry data. (The increase might, in fact, be smaller than indicated because of the possible shift from the use of formal entries for low-value shipments to the use of informal entries as a result of the value limit on informal entries being raised, effective September 1953, from $100 to $250.) This increase has been distributed and is included, as appropriate, in the commodity group and commodity subgroup totals. All three totals have been further affected by the fact that they now include estimates and are therefore subject to sampling variability.

Changes in coverage and compiling procedures reflected in recent calendar year issues of Report No. FT 110 are shown below:

Year	Coverage and procedure
1952 and prior years	Fully compiled formal entry items by seven-digit commodity numbers. Informal entry items (valued $100 or less) excluded.
1953:	
January-June	Fully compiled formal entry items by seven-digit commodity numbers. Informal entry items (valued $100 or less) excluded.
July-December	Fully compiled formal entry items valued $100 and over by seven-digit commodity numbers. Estimated dollar value of formal entry items valued at less than $100 included in the total for commodity group 9 "Miscellaneous" and excluded from subgroup and group totals as well as from the detailed commodity and commodity by country data. Informal entry items (valued $100 or less July and August and $250 or less September-December) excluded.
1954-1957	Fully compiled formal entry items valued $250 and over by seven-digit commodity numbers. Estimated dollar value of formal entry items $250 and under by seven-digit commodity numbers (shown in Appendix). Estimated dollar value of informal entry items ($250 and under) by first four digits of the seven-digit commodity numbers (shown in Appendix).

TABLE OF CONTENTS

Description	Schedule A Commodity Code No.	Page No.
GROUP 00 - ANIMALS AND ANIMAL PRODUCTS, EDIBLE		
Animals, edible (except for breeding)	0010600-0015500	8
Meat products	0018300-0035500	8
Animal oils and fats, edible	0036000-0036900	9
Dairy products	0037000-0046990	9
Fish and fish products, except shellfish	0047000-0079590	10
Shellfish and products	0080100-0087900	13
Other edible animal products	0088100-0097900	14
GROUP 0 - ANIMALS AND ANIMAL PRODUCTS, INEDIBLE		
Hides and skins, raw (except furs)	0201000-0299900	14
Leather	0300100-0345900	17
Leather, rawhide, and parchment manufactures	0350300-0699990	19
Furs and manufactures	0701000-0759900	24
Animal and fish oils, fats, and greases, inedible	0803000-0821600	26
Other inedible animals and animal products	0840000-0990290	26
GROUP 1 - VEGETABLE FOOD PRODUCTS AND BEVERAGES		
Grains and preparations	1020000-1090260	30
Fodders and feeds, n.e.s	1101000-1190800	31
Vegetables and preparations	1191100-1250990	31
Fruits and preparations	1290000-1330990	33
Nuts and preparations	1350000-1380140	35
Vegetable oils and fats, edible	1420000-1428900	36
Cocoa, coffee, and tea	1501300-1521000	36
Spices	1523100-1550590	37
Sugar and related products	1570000-1654800	38
Beverages	1711300-1900000	39
GROUP 2 - VEGETABLE PRODUCTS, INEDIBLE, EXCEPT FIBERS AND WOOD		
Rubber and allied gums and manufactures	2011000-2098900	41
Gums, resins, and balsams, n.e.s	2102000-2189400	42
Drugs, herbs, leaves, roots, etc	2201000-2220490	43
Oil seeds	2231000-2240700	44
Vegetable oils and vegetable waxes	2241000-2290590	45
Dyeing and tanning materials	2302000-2345950	47
Seeds, except oil seeds	2401000-2460990	47
Nursery and greenhouse stock	2501000-2599100	48
Tobacco and manufactures	2601000-2629900	49
Miscellaneous vegetable products	2800000-2960150	49
GROUP 3 - TEXTILE FIBERS AND MANUFACTURES		
Cotton unmanufactured	3001010-3005000	50
Cotton semimanufactures	3006150-3020999	50
Cotton manufactures	3030000-3230800	51
Jute and manufactures	3241000-3250900	57
Flax, hemp, and ramie, and manufactures	3261000-3390590	58
Other vegetable fibers and manufactures	3401000-3421990	61
Wool, unmanufactured	3501000-3541000	62
Wool semimanufactures	3550000-3574600	65
Wool manufactures	3607000-3680800	66
Hair and manufactures, n.e.s	3690000-3698900	72
Silk, unmanufactured	3702000-3704200	73
Silk manufactures	3705100-3799900	73
Manufactures of rayon or other Man-made (synthetic) textile	3800000-3880490	76
Miscellaneous textile products	3900300-3981100	78
GROUP 4 - WOOD AND PAPER		
Wood, unmanufactured	4007100-4080500	81
Sawmill products (lumber)	4103100-4207555	81
Wood manufactures	4208000-4280990	82
Cork and manufactures	4300000-4321900	85
Paper base stocks	4590000-4692900	86
Paper and manufactures	4711000-4799990	86
GROUP 5 - NONMETALLIC MINERALS		
Coal and related fuels	5001000-5014300	90
Petroleum and products	5052100-5079100	90
Stone, lime, cement, gypsum, and gypsum products	5080250-5193900	91
Glass and glass products	5200400-5290900	92
Clay and clay products	5300000-5390700	98
Other nonmetallic minerals and manufactures (except precious stones and imitations)	5391000-5930980	101
Precious and semiprecious stones and imitations and industrial diamonds	5950000-5958200	104
GROUP 6 - METALS AND MANUFACTURES, EXCEPT MACHINERY AND VEHICLES		
Iron ore and concentrates	6001000-6001100	105
Iron and steel semimanufactures	6002000-6060300	105
Steel mill products—manufactures	6081020-6116100	108
Iron and steel advanced manufactures	6117000-6200990	112
Ferro-alloys, ores, and metals, n.e.s	6211000-6270900	117
Nonferrous metals, except precious	6301000-6790990	119
Precious metals, jewelry, and plated ware	6820000-6900550	126
GROUP 7 - MACHINERY AND VEHICLES		
Electrical machinery and apparatus	7063200-7100990	128
Engines, turbines, and parts, n.e.s	7110000-7110700	130
Other machinery, except agricultural	7400200-7800990	131
Agricultural machinery and implements	7850000-7890190	135
Vehicles, except agricultural	7900100-7940290	136
GROUP 8 - CHEMICALS AND RELATED PRODUCTS		
Coal-tar products	8001000-8090900	137
Medicinal and pharmaceutical preparations	8102000-8150600	138
Industrial chemicals	8170040-8380982	139
Pigments, paints, and varnishes	8400100-8441300	144
Fertilizers and fertilizer materials	8500000-8559900	145
Explosives, fireworks, and ammunition	8620000-8695000	145
Soap and toilet preparations	8712300-8731200	146
GROUP 9 - MISCELLANEOUS		
Photographic goods	9001000-9036600	147
Scientific and professional instruments, apparatus, and supplies, n.e.s	9140200-9180290	149
Musical instruments, parts, and accessories	9200000-9280700	150
Dolls and toys, athletic and sporting goods	9400000-9439990	152
Firearms	9470000-9477000	153
Books, maps, pictures, and other printed matter, n.e.s	9500000-9530890	154
Clocks, watches, clockwork mechanisms, and parts	9540100-9590900	157
Art works and antiques	9610000-9670300	160
Miscellaneous articles, n.e.s	9700000-9990750	162
Appendix "A"	.....	169
Appendix "B"	.....	171

UNITS OF QUANTITY

[The following is a list of the abbreviations for units of quantity used in this report. When quantity is reported in two units for a commodity the second quantity is shown separately, without value, under the same commodity number and immediately following the data for the first unit of quantity (e.g. "Cotton cloth, unbleached," and "Manganese ore," Schedule A Commodity Numbers 3040 001-3047 999 and 6211 000 respectively.)]

Abbrev.	Unit of Quantity	Abbrev.	Unit of Quantity	Abbrev.	Unit of Quantity	Abbrev.	Unit of Quantity
AOZ	Advoirdupois Ounce	DPC	Dozen Pieces	LF	Leaf	PK	Pack
BBL	Barrel	DPR	Dozen Pair	LFT	Linear Foot	PR	Pair

[1]The figures for this commodity, like other commodities, are known not to be comparable with figures for years prior to 1954 because of certain changes in import procedures for shipments valued $250 or less resulting from the Customs Simplification Act of 1953. See Appendix at the end of this report for an indication of the effect on this particular commodity in 1957.

[C]Sampling error (see Explanation, page 5) is not greater than 15 to 20 percent.

[G]Sampling error (see Explanation, page 5) is not greater than $8,000 to $11,000.

[1] The figures for this commodity, like other commodities, are known not to be comperable with figures for years prior to 1954 because of certain changes in import procedures for shipments valued $250 or less resulting from the Customs Simplification Act of 1953. See Appendix at the end of this report for an indication of the effect on this particular commodity in 1957.

[1]The figures for this commodity, like other commodities, are known not to be comparable with figures for years prior to 1954 because of certain changes in import procedures for shipments valued $250 or less resulting from the Customs Simplification Act of 1953. See Appendix at the end of this report for an indication of the effect on this particular commodity in 1957.

[1]The figures for this commodity, like other commodities, are known not to be comparable with figures for years prior to 1954 because of certain changes in import procedures for shipments valued $250 or less resulting from the Customs Simplification Act of 1953. See Appendix at the end of this report for an indication of the effect on this particular commodity in 1957.

[1]The figures for this commodity, like other commodities, are known not to be comperable with figures for years prior to 1954 because of certain changes in import procedures for shipments valued $250 or less resulting from the Customs Simplification Act of 1953. See Appendix at the end of this report for an indication of the effect on this particular commodity in 1957.

[1]The figures for this commodity, like other commodities, are known not to be comparable with figures for years prior to 1954 because of certain changes in import procedures for shipments valued $250 or less resulting from the Customs Simplification Act of 1953. See Appendix at the end of this report for an indication of the effect on this particular commodity in 1957.

[b]Sampling error (see Explanation, page 5) is not greater than 10 to 15 percent.

[g]Sampling error (see Explanation, page 5) is not greater than $8,000 to $11,000.

UNITED STATES IMPORTS OF MERCHANDISE FOR CONSUMPTION

CALENDAR YEAR 1957

[1] The figures for this commodity, like other commodities, are known not to be comperable with figures for years prior to 1954 because of certain changes in import procedures for shipments valued $250 or less resulting from the Customs Simplification Act of 1953. See Appendix at the end of this report for an indication of the effect on this particular commodity in 1957.

[2] Country of Shipment (Country of Origin Unknown)

[C] Sampling error (see Explanation, page 5) is not greater than 15 to 20 percent.

[1]The figures for this commodity, like other commodities, are known not to be comperable with figures for years prior to 1954 because of certain changes in import procedures for shipments valued $250 or less resulting from the Customs Simplification Act of 1953. See Appendix at the end of this report for an indication of the effect on this particular commodity in 1957.

[a]Sampling error (see Explanation, page 5) is not greater than 5 to 10 percent.

[1]The figures for this commodity, like other commodities, are known not to be comparable with figures for years prior to 1954 because of certain changes in import procedures for shipments valued $250 or less resulting from the Customs Simplification Act of 1953. See Appendix at the end of this report for an indication of the effect on this particular commodity in 1957.

[2]Country of Shipment (Country of Origin Unknown)

[3]Sampling error (see Explanation, page 5) is not greater than 5 to 10 percent.

[1] The figures for this commodity, like other commodities, are known not to be comparable with figures for years prior to 1954 because of certain changes in import procedures for shipments valued $250 or less resulting from the Customs Simplification Act of 1953. See Appendix at the end of this report for an indication of the effect on this particular commodity in 1957.

[6] Sampling error (see Explanation, page 5) is not greater than $8,000 to $11,000.

[1]The figures for this commodity, like other commodities, are known not to be comparable with figures for years prior to 1954 because of certain changes in import procedures for shipments valued $250 or less resulting from the Customs Simplification Act of 1953. See Appendix at the end of this report for an indication of the effect on this particular commodity in 1957.

[g]Sampling error (see Explanation, page 5) is not greater than $8,000 to $11,000.

CANADA	4,755,648	1,492,264

[1] The figures for this commodity, like other commodities, are known not to be comperable with figures for yeare prior to 1954 bscause of certain changes in import procedures for shipments valued $250 or less resulting from the Customs Simplification Act of 1953. See Appendix at the end of thie report for an indication of the effect on this particular commodity in 1957.

[b] Sampling error (see Explanation, page 5) is not greater than 10 to 15 percent.

[f] Sampling error (see Explanation, page 5) is not greater than $6,000 to $8,000.

[1]The figures for this commodity, like other commodities, are known not to be comparable with figures for years prior to 1954 because of certain changes in import procedures for shipments valued $250 or less resulting from the Customs Simplification Act of 1953. See Appendix at the end of this report for an indication of the effect on this particular commodity in 1957.

[8]Sampling error (see Explanation, page 5) is not greater than 5 to 10 percent.

[1]The figures for this commodity, like other commodities, are known not to be comparable with figures for years prior to 1954 because of certain changes in import procedures for shipments valued $250 or less resulting from the Customs Simplification Act of 1953. See Appendix at the end of this report for an indication of the effect on this particular commodity in 1957.

[a]Sampling error (see Explanation, page 5) is not greater than 5 to 10 percent.

[1]The figures for this commodity, like other commodities, are known not to be comparable with figures for years prior to 1954 because of certain changes in import procedures for shipments valued $250 or less resulting from the Customs Simplification Act of 1953. See Appendix at the end of this report for an indication of the effect on this particular commodity in 1957.

[3]Before using these data see the SPECIAL NOTICE under COMMODITY INFORMATION on page 3.

[1]The figures for this commodity, like other commodities, are known not to be comparable with figures for years prior to 1954 because of certain changes in import procedures for shipments valued $250 or less resulting from the Customs Simplification Act of 1953. See Appendix at the end of this report for an indication of the effect on this particular commodity in 1957.

[1]The figures for this commodity, like other commodities, are known not to be comparable with figures for years prior to 1954 because of certain changes in import procedures for shipments valued $250 or less resulting from the Customs Simplification Act of 1953. See Appendix at the end of this report for an indication of the effect on this particular commodity in 1957.

[2]Sampling error (see Explanation, page 5) is not greater than $20,000 to $30,000.

[1] The figures for this commodity, like other commodities, are known not to be comparable with figures for years prior to 1954 because of certain changes in import procedures for shipments valued $250 or less resulting from the Customs Simplification Act of 1953. See Appendix at the end of this report for an indication of the effect on this particular commodity in 1957.

[a] Country of Shipment (Country of Origin Unknown)

[b] Sampling error (see Explanation, page 5) is not greater than 10 to 15 percent.

1/ The figures for this commodity, like other commodities, are known not to be comparable with figures for years prior to 1954 because of certain changes in import procedures for shipments valued $250 or less resulting from the Customs Simplification Act of 1953. See Appendix at the end of this report for an indication of the effect on this particular commodity in 1957.

1/ The figures for this commodity, like other commodities, are known not to be comparable with figures for years prior to 1954 because of certain changes in import procedures for shipments valued $250 or less resulting from the Customs Simplification Act of 1953. See Appendix at the end of this report for an indication of the effect on this particular commodity in 1957.

[1]The figures for this commodity, like other commodities, are known not to be comparable with figures for years prior to 1954 because of certain changes in import procedures for shipments valued $250 or less resulting from the Customs Simplification Act of 1953. See Appendix at the end of this report for an indication of the effect on this particular commodity in 1957.

[1]/4321600 CORK TILE, OVER 3/8 INCH THICK-LB		
DENMARK	116,193	46,101

[1]The figures for this commodity, like other commodities, are known not to be comperable with figures for years prior to 1954 because of certain changes in import procedures for shipments valued $250 or less resulting from the Customs Simplification Act of 1953. See Appendix at the end of this report for an indication of the effect on this particular commodity in 1957.

[2]Country of Shipment (Country of Origin Unknown)

[c]Sampling error (see Explanation, page 5) is not greater than 15 to 20 percent.

[1]The figures for this commodity, like other commodities, are known not to be comparable with figures for years prior to 1954 because of certain changes in import procedures for shipments valued $250 or less resulting from the Customs Simplification Act of 1953. See Appendix at the end of this report for an indication of the effect on this particular commodity in 1957.

[2]Country of Shipment (Country of Origin Unknown)

[a]Sampling error (see Explanation, page 5) is not greater than 5 to 10 percent.

[1] The figures for this commodity, like other commodities, are known not to be comparable with figures for years prior to 1954 because of certain changes in import procedures for shipments valued $250 or less resulting from the Customs Simplification Act of 1953. See Appendix at the end of this report for an indication of the effect on this particular commodity in 1957.

UNITED STATES IMPORTS OF MERCHANDISE FOR CONSUMPTION

CALENDAR YEAR 1957

1/The figures for this commodity, like other commodities, are known not to be comparable with figures for years prior to 1954 because of certain changes in import procedures for shipments valued $250 or less resulting from the Customs Simplification Act of 1953. See Appendix at the end of this report for an indication of the effect on this particular commodity in 1957.

[1]The figures for this commodity, like other commodities, are known not to be comparable with figures for years prior to 1954 because of certain changes in import procedures for shipments valued $250 or less resulting from the Customs Simplification Act of 1953. See Appendix at the end of this report for an indication of the effect on this particular commodity in 1957.

1/The figures for this commodity, like other commodities, are known not to be comparable with figures for years prior to 1954 because of certain changes in import procedures for shipments valued $250 or less resulting from the Customs Simplification Act of 1953. See Appendix at the end of this report for an indication of the effect on this particular commodity in 1957.

[1] The figures for this commodity, like other commodities, are known not to be comparable with figures for years prior to 1954 because of certain changes in import procedures for shipments valued $250 or less resulting from the Customs Simplification Act of 1953. See Appendix at the end of this report for an indication of the effect on this particular commodity in 1957.

[b] Sampling error (see Explanation, page 5) is not greater than $11,000 to $15,000.

[1]The figures for this commodity, like other commodities, are known not to be comparable with figures for years prior to 1954 because of certain changes in import procedures for shipments valued $250 or less resulting from the Customs Simplification Act of 1953. See Appendix at the end of this report for an indication of the effect on this particular commodity in 1957.

[1]The figures for this commodity, like other commodities, are known not to be comparable with figures for years prior to 1954 because of certain changes in import procedures for shipments valued $250 or less resulting from the Customs Simplification Act of 1953. See Appendix at the end of this report for an indication of the effect on this particular commodity in 1957.

[a]Sampling error (see Explanation, page 5) is not greater than 5 to 10 percent.

[b]Sampling error (see Explanation, page 5) is not greater than 10 to 15 percent.

[1] The figures for this commodity, like other commodities, are known not to be comparable with figures for years prior to 1954 because of certain changes in import procedures for shipments valued $250 or less resulting from the Customs Simplification Act of 1953. See Appendix at the end of this report for an indication of the effect on this particular commodity in 1957.

[2] Country of Shipment (Country of Origin Unknown)

[3] Sampling error (see Explanation, page 5) is not greater than $15,000 to $20,000.

[4] No estimate for shipments $1-$250 (see Explanation, page 8) is included in data for this subgroup because no item appeared in the sample. Statistical measures indicate that the resulting undercounting may be as much as $2,000. However, for commodities not ordinarily imported in shipments of $250 or less, the figures in this report may be accepted as substantially correct since in these cases the absence of any $1-$250 shipments in the sample may mean that no such shipments were made.

[5] Sampling error (see Explanation, page 5) is not greater than $6,000 to $8,000.

[1] The figures for this commodity, like other commodities, are known not to be comparable with figures for years prior to 1954 because of certain changes in import procedures for shipments valued $250 or less resulting from the Customs Simplification Act of 1953. See Appendix at the end of this report for an indication of the effect on this particular commodity in 1957.

[a] Sampling error (see Explanation, page 5) is not greater than 5 to 10 percent.

[e] Sampling error (see Explanation, page 5) is not greater than $6,000 to $8,000.

[1] The figures for this commodity, like other commodities, are known not to be comparable with figures for years prior to 1954 because of certain changes in import procedures for shipments valued $250 or less resulting from the Customs Simplification Act of 1953. See Appendix at the end of this report for an indication of the effect on this particular commodity in 1957.

[3] Revision of the statistics to reflect these imports under Schedule A Commodity Number 6790930 when the necessary quantity information is obtained will be shown in the "Revisions in Previous Month's Reports" section of a future issue of this report. Schedule A Number 6790920 was deleted retroactive to January 1, 1957.

[1] The figures for this commodity, like other commodities, are known not to be comparable with figures for years prior to 1954 because of certain changes in import procedures for shipments valued $250 or less resulting from the Customs Simplification Act of 1953. See Appendix at the end of this report for an indication of the effect on this particular commodity in 1957.

[c] Sampling error (see Explanation, page 5) is not greater than 15 to 20 percent.

1/ The figures for this commodity, like other commodities, are known not to be comparable with figures for years prior to 1954 because of certain changes in import procedures for shipments valued $250 or less resulting from the Customs Simplification Act of 1953. See Appendix at the end of this report for an indication of the effect on this particular commodity in 1957.

[1]The figures for this commodity, like other commodities, are known not to be comparable with figures for years prior to 1954 because of certain changes in import procedures for shipments valued $250 or less resulting from the Customs Simplification Act of 1953. See Appendix at the end of this report for an indication of the effect on this particular commodity in 1957.

[c]Sampling error (see Explanation, page 5) is not greater than 15 to 20 percent.

1/The figures for this commodity, like other commodities, are known not to be comparable with figures for years prior to 1954 because of certain changes in import procedures for shipments valued $250 or less resulting from the Customs Simplification Act of 1953. See Appendix at the end of this report for an indication of the effect on this particular commodity in 1957.

2/Sampling error (see Explanation, page 5) is not greater than 5 to 10 percent.

[1]The figures for this commodity, like other commodities, are known not to be comparable with figures for years prior to 1954 because of certain changes in import procedures for shipments valued $250 or less resulting from the Customs Simplification Act of 1953. See Appendix at the end of this report for an indication of the effect on this particular commodity in 1957.

[2]Country of Shipment (Country of Origin Unknown)

[3]Sampling error (see Explanation, page 5) is not greater than 5 to 10 percent.

[1] The figures for this commodity, like other commodities, are known not to be comparable with figures for years prior to 1954 because of certain changes in import procedures for shipments valued $250 or less resulting from the Customs Simplification Act of 1953. See Appendix at the end of this report for an indication of the effect on this particular commodity in 1957.

[1] The figures for this commodity, like other commodities, are known not to be comparable with figures for years prior to 1954 because of certain changes in import procedures for shipments valued $250 or less resulting from the Customs Simplification Act of 1953. See Appendix at the end of this report for an indication of the effect on this particular commodity in 1957.

[1] The figures for this commodity, like other commodities, are known not to be comparable with figures for years prior to 1954 because of certain changes in import procedures for shipments valued $250 or less resulting from the Customs Simplification Act of 1953. See Appendix at the end of this report for an indication of the effect on this particular commodity in 1957.

[2] Country of Shipment (Country of Origin Unknown)

[3] Sampling error (see Explanation, page 5) is not greater than 5 to 10 percent.

[1] The figures for this commodity, like other commodities, are known not to be comparable with figures for years prior to 1954 because of certain changes in import procedures for shipments valued $250 or less resulting from the Customs Simplification Act of 1953. See Appendix at the end of this report for an indication of the effect on this particular commodity in 1957.

[2] Sampling error (see Explanation, page 5) is not greater than 5 to 10 percent.

APPENDIX A

U. S. Imports of Merchandise for Consumption, by Commodity Subgroup; Value for the Fully Compiled Over $250 Formal Entry Shipments the Estimated Value of $1 to $250 Shipments for Formal and for Informal Entries Calendar Year 1957

The data presented in this appendix supplement the calendar year 1957 subgroup statistics in the body of Report FT 110. The estimated values for $1-$250 shipments which are shown separately for formal and informal entries, are compiled from a 5 percent sample of such shipments multiplied by 20, and when combined represent the subgroup figures designated as "SAMPLE" in Report FT 110.

These data are intended to provide the user of the import statistics with a rough measure of the change in coverage of the import statistics, on a commodity subgroup basis, as a result of the inclusion of informal entries in the import statistics beginning January 1954. (Prior to 1954 informal entries were excluded from the statistics. As a result of the Customs Simplification Act of 1953 which raised the value limit on informal entries from $100-$250 effective September 1953, informal entries were included in the statistics beginning January 1954.) Only a rough measure of the effect of the changes in coverage is possible, however, since (1) no analysis can be made of the shift, if any, from the use of formal entries for low value shipments to the use of informal entries as a result of the Customs Simplification Act of 1953, and (2) the estimated values are subject to sampling variability.

In addition, in any comparison of these data with the statistics for 1953 the inclusion of the entire estimated amounts for formal entry import items valued at $250 or less in the commodity subgroup and the commodity group totals in which they belong, effective January 1954, may effect, to a relatively minor extent, the comparability of these totals with corresponding totals for 1953. During the period July through December 1953 estimates of formal entry items valued at less than $100 were included in the total for commodity group 9 "Miscellaneous" and were excluded from the subgroup and group totals.

On the basis of measures which indicate the degree of reliability to be attached to a specific value on a two-chances-out-of-three basis most of the over-all (i.e., the over $250 data plus the $1-$250 figures for formal and informal entries) subgroup figures which can be derived have a limit of sampling variability of not greater than 5 percent. The variability of the estimated values for the $1-$250 shipments alone, however, is generally greater than 5 percent. The sampling variability of any value in this appendix comprised solely of $1-$250 estimated values can generally be approximated on the basis of the magnitude of the value itself. Where the value is less than $25,000 the variability is in general between $5,000 and $10,000. If the value is between $25,000 and $75,000 the variability is in general between $10,000 and $16,000. If the value is between $75,000 and $125,000 the variability is in general between $16,000 and $22,000. If the value is between $125,000 and $200,000 the variability is in general between $22,000 and $34,000. If the value is between $200,000 and $500,000 the variability is in general between $26,000 and $43,000. The variability of values of $500,000 and over is generally less than 7 percent. If a fully compiled figure is added to an estimated $1-$250 figure, the absolute sampling variability of the sum is the same as the absolute sampling variability of the estimated figure alone.

For example, in the case of the subgroup data for meat products, the variability of the $792,060 estimated for $1-$250 formal entry shipments would be less than 7 percent. The variability of the $152,980 estimated for $1-$250 informal entry shipments would be between $22,000 and $34,000. The variability of the derived figure of $945,040 ($792,060 plus $152,980) for the total estimated value for $1-$250 shipments would be less than 7 percent, while the over-all derived value of $183,975,587 ($183,030,547 plus $792,060 plus $152,980) for imports of all meat products would be considerably less than 1 percent.

A more detailed discussion of the sampling procedure and the change in coverage is presented in the "Explanation" beginning on page 4.

[2]Classification established for informal entry importations not classifiable in terms of commodity subgroup detail. See April 1955 issue of the Notes.

APPENDIX B

UNITED STATES IMPORTS OF MERCHANDISE FOR CONSUMPTION BY SEVEN-DIGIT SCHEDULE A COMMODITY FOR COMMODITIES FOR WHICH TRERE WERE $1 - $250 FORMAL ENTRY SHIPMENTS IN THE SAMPLE AND BY FOUR-DIGIT SCHEDULE A COMMODITY GROUPING FOR ALL OTHER CLASSIFICATIONS CALENDAR YEAR 1957

The data presented by commodity in this Appendix for shipments valued $1 - $250, supplement the detailed commodity statistics in Report FT 110 from which the $1 - $250 shipments are excluded. These data are estimated values and represent the compiled value for the 5 percent sample of the $1 - $250 shipments multiplied by 20. The values are shown separately for formal and informal entries. Prior to 1954 informal entries were excluded from the statistics. As a result of the Customs Simplification Act of 1953 which raised the value limit on informal entries from $100 to $250 effective September 1953, informal entries were included in the statistics beginning January 1954. A more detailed discussion of the sampling procedure and the change in coverage is presented in the "Explanation" beginning on page 5.

The data shown in this Appendix are intended to provide the user of the import statistics with s rough measure of the undercounting in the detailed commodity statistics for 1957 as a result of the exclusion of the $1 - $250 shipments from the import statistics. Only a rough measure of the undercounting is possible for any detailed commodity classification, however, since (1) the estimated value for $1 - $250 shipments reported on informal entries is shown only in terms of four-digit commodity groupings and not in terms of seven-digit commodity detail, and (2) all estimated values are subject to sampling variability. (The estimated value for informal entries is shown only in terms of the broader four-digit commodity classifications since the more detailed seven-digit Schedule A commodity descriptions are not required to be supplied, and are often not shown, on informal entries.)

On the basis of measures which indicate the degree of reliability to be attached to a specified value on a two-chances-out-of-three basis the sampling variability of any value in this Appendix comprised solely of $1 - $250 estimated values can be approximated on the basis of the value itself. Where the value is less than $5,000 the variability is in general between $4,000 and $6,000. If the value is between $5,000 and $20,000 the variability is in general between $5,000 and $10,000. If the value is between $20,000 and $100,000 the variability is in general between $10,000 and $20,000. If the value is between $100,000 and $500,000 the variability is in general between $20,000 and $40,000. The variability of values of $500,000 and over is generally less than 7 percent. If a fully compiled figure is added to an estimated $1 - $250 figure, the absolute sampling variability of the sum is the same as the absolute sampling variability of the estimated figure alone.

A rough estimate of the value of total imports on a commodity basis can be obtained by adding the under $250 shipments plus allowance for sampling variability to the fully compiled over $250 shipments in accordance with the example given below. Caution should be used in adding to the data for any particular seven-digit classification the value of shipments on informal entries which is provided only in terms of the four-digit commodity grouping. It is not known if all, part, or any, of the value of the informal entries represents shipments of any particular seven-digit commodity classification within the four-digit grouping. The user's own knowledge of the usual pattern of shipments on informal entries may enable him to make a rough approximation of the distribution among the detailed seven-digit classifications of the value of shipments on informal entries.

Example: (1) Total imports of commodity 0010 800 may be estimated as follows: The estimated value of $39,600 for formal entry $1 - $250 shipments plus all, or a part (if any) of informal entry shipments estimated at $3,000 (based on the user's knowledge of the importing pattern). If it is assumed that informal entry importations are distributed among the seven-digit classifications within the four-digit grouping as are the formal $1 - $250 entries then $39,600 plus spproximately $1,000 (assumed informal shipments) equals about $40,000 estimated total formal and informal entry shipments. With allowance for sampling variability of about $15,000 it might be assumed that estimated $1 - $250 formal and informal shipments of commodity 0010 800 would not be greater than about $55,000 or less than $25,000 and that the total imports of commodity 0010 800 would probably not be greater than about $4,367,000 or less than $4,337,000.

(2) Commodity 0025 900 is not listed separately but is included in the four-digit grouping "other 0025" because there were no formal entry $1 - $250 shipments in the sample for this commodity. By reference to Report FT 110 it is determined that imports of 0025 900 in shipments of over $250 amounted to $1,463. Since there were no $1 - $250 formal entry shipments included in the sample for commodity 0025 900 shipments valued $1 - $250 for this commodity probably were not greater than $2,000. However, if it can be assumed that formal entry shipments valued $1 - $250 are generally not made for 0025 900 and that the pattern is the same for informal entries, then it can be assumed that imports of 0025 900 did not amount to more than $3,463.

In any use of the 1957 data in this Appendix for purposes of comparison with the statistics for years prior to 1954 attention is called not only to the inclusion of informal entries in the statistics beginning January 1954 but also to the fact that (1) no analysis can be made of the shift, if any, from the use of formal entries as a result of the Customs Simplification Act of 1953, and (2) during July-December 1953 formal entry shipments valued at less than $100 were excluded from the detailed commodity statistics.

UNITED STATES IMPORTS OF MERCHANDISE FOR CONSUMPTION—SAMPLE COMMODITY DATA: CALENDAR YEAR 1957

*No estimate for $1-$250 shipments is shown, because no item appeared in the sample. Statistical measures indicate that the resulting undercounting may be as much as $2,000. However, for commodities not ordinarily imported in shipments valued $1-$250, the figures in the table may be accepted as substantially correct, since in these cases the absence of any $1-$250 shipments in the sample may mean that no such shipments were made.

[1]The data shown are only for those informal entries which contained commodity descriptions detailed enough to permit presentation of the data by four-digit classifications. Excluded are those informal entries on which the description of the merchandise was not specific enough to permit presentation of the data except in terms of (1) commodity subgroup (i.e., groupings of four-digit classifications), or (2) an arbitrary catch-all classification ("other 1-250 dollar items") which has been set up as a separate commodity subgroup. Data for each of these two "types" of informal entries are shown below by commodity subgroup. Reference to Appendix A in which they are included will provide information on all the seven-digit commodity classifications which are included in a commodity subgroup.

Commodity subgroup number and description	Value (dollars)	Commodity subgroup number and description	Value (dollars)	Commodity subgroup number and description	Value (dollars)
Total	2,360,780	39 Other vegetable fibers and manufactures	1,200	68 Nickel and manufactures	4,200
		42 Wool manufactures	82,920	72 Precious metals, jewelry, and plated ware	1,080
02 Meat products	2,000	44 Silk and manufactures	29,780		
04 Dairy products	1,820	45 Synthetic fibers and manufactures	32,860	73 Electrical machinery and apparatus	9,460
05 Fish and fish products, except shellfish	5,600			74 Engines, turbines, and parts, n.e.s.	900
09 Leather	800	47 Wood, unmanufactured	26,820	75 Other machinery, except agricultural	15,880
10 Leather, rawhide, and parchment manufactures	676,240	48 Sawmill products (lumber)	3,340	77 Vehicles and parts	200
11 Furs and manufactures	5,480	51 Paper base stocks	175,560		
13 Other inedible animals and animal products	8,900	52 Paper and manufactures	3,960	78 Coal-tar products	5,100
				79 Medicinal and pharmaceutical preparations	15,260
16 Vegetables and preparations	220			80 Industrial chemicals	13,080
		55 Stone, lime, cement, gypsum and gypsum products	700	84 Soap and toilet preparations	900
24 Rubber and allied gums and manufactures	5,760	56 Glass and products	980		
33 Miscellaneous vegetable products	1,640	57 Clay and products	3,460	85 Photographic goods	4,440
				91 Clocks, watches, clockwork mechanisms and parts	1,100
36 Cotton manufactures	11,200			95 Other 1-250 dollar items	1,187,940
38 Flax, hemp, and ramie, and manufactures	19,600	61 Steel mill products	400
